

## PROFILE

"Resourceful professional with a solid foundation in commerce, technology, and project management. Skilled in optimizing processes, enhancing operational efficiency, and providing exceptional technical support. Adept at leveraging analytical skills and creative solutions across sectors, including DevOps, management, and fintech. Eager to learn and apply my expertise in fast-paced environments. Looking to contribute to a forward-thinking organization."

## KEY-SKILLS

### Technical Skills:

- DevOps: CI/CD, Docker, Kubernetes, Jenkins, Terraform, Ansible
- Cloud Computing: AWS
- Scripting & Automation: Python, Shell scripting
- Version Control: GitHub, GitLab, GitHub Actions, JIRA
- Monitoring & Logging: Grafana, Prometheus
- Serverless Architecture, CircleCI, Infrastructure as Code (IaC)
- Linux (Ubuntu)

### Business & Management:

- Project Management
- Resource Optimization
- Cost Management
- Technical Support & Troubleshooting
- Customer Relationship Management
- Financial Analysis & Reporting

### Certifications:

- Python for DevOps
- Advanced DevOps Course
- Computer Networking

## EXPERIENCE

### Administrative Support Intern:

- Provided administrative and customer support services, contributing to efficient office operations.
- Monitor and update Servers, Managed client interactions, data entry, and document preparation, enhancing service quality.

## PROJECTS

### Streamlined Workflows with AWS Tools:

- Achieved 30% time savings in DevOps workflow using AWS tools.
- Reduced deployment errors and downtime by 60%.
- Improved team efficiency by 35% through automation.

### Serverless Task Master Application:

- Developed a serverless Task Master app integrating AWS and GitHub.
- Reduced development cycle duration by 30% and deployment costs by 25%.

### End-to-End CI/CD Implementation:

- Proficiently used Kubernetes, Docker, and Django to enhance application efficiency by 40%.
- Reduced deployment time by 30% and enabled scalability.

### Automating Infrastructure with Terraform:

- Constructed scalable infrastructure using Terraform modules, achieving 50% cost savings.
- Reduced infrastructure management time by 30% and downtime by 40%.

## EDUCATION

- M.Com in Commerce      2016 – 2019
- B.Com in Management      2013 – 2016
- Post-Graduate Diploma in Intellectual Property Rights 2019 – 2021
